

Resources, Requirements and Evaluation Criteria

Resources

Figma: [iMed Global Developers – Figma](#)

Requirements

- System architecture
- Database schema
- Backend design approach
- Supporting documentation

Evaluation Criteria

1. Fully take ownership of the assigned project
2. The quality and maturity of decisions made as a project lead
3. Proactively raises the right questions to clarify business requirements
4. Capability to estimate backend development scope realistically
5. Database design quality (expected to be ~70–80% correct initially), including seeking review feedback
6. Overall system design thinking and ability to defend the approach during a review session
